

Energy Data Summit

Friday, 8. December 2023

#EnergyWeekETH

Dr. Adriana Marcucci

Energy Science Center, ETH Zurich

Matthias Eifert

HSLU

Welcome

The Energy Data Summit

Energy Data Summit
ENERGY WEEK
@ ETH 2023

- Swiss Federal Office SWEET CoSi (Co-Evolution and Coordinated Simulation of the Swiss Energy System and Swiss Society) → Data
 - What does that exactly mean?
 - We know the challenges, but how shall we move forward?

Energy Data Summit:

- Joint solutions (Multiple heads are better than one)
- It is time to change the discourse: start doing
- Getting started is more important than getting all right

- My personal objective today: Each one of you goes home with one (or more) task

What is the main challenge of open data?

Energy Data Summit
ENERGY WEEK
@ ETH 2023

Objectives

1. Learning from diverse experiences:
 - Gain insights from various stakeholders' experiences
 - Understand success stories and challenges
2. Identify challenges and joint solutions:
 - Identify common challenges in energy data
 - Identify specific actions for collective progress (what?, who?)
3. Establishing a collaborative platform:
 - Foster knowledge exchange and networking
 - Engage experts from research, industry, government, and interest groups

Today

Rules of the game

- Be the crew, not the passenger
 - Today is not only about listening the speakers... It is about finding solutions together
 - Ask, leave ideas on the boards, be creative
- Getting started is more important than getting all right
- Tackle problems, not people
